DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Invention I, Species F in the reply filed on 4/24/08 is acknowledged.

Applicant's election with traverse of Species F, G and H in the reply filed on 4/24/08 is acknowledged. The traversal is on the ground(s) that Species F, G and H are same embodiment (Figs. 14-16). Examiner agrees at this point.

It is noted that there is no valve cage in Figs. 15-16 as Applicant recites in claims 7-8. Claims 7-8 belong to Figs. 17-18 (non elected species) with a cage 121. Therefore, Examiner will not exam claims 7-8.

Claims 4-8, 9-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group II & III, and Species A-E and I there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/24/08.

Applicant states that claims 4-6, 9-19 and 22-23 were cancelled in the preliminary amendment of March 31, 2004. However, there is no record show that these claims are cancelled by Applicant.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "a second valve seat" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the

Art Unit: 3763

brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Richmond (US 4,946,448).

Richmond discloses an injection port comprising: a housing defining a flow channel 80; an injection lumen 66; a valve element 84 having properties for forming a first, second and third valve seats 82, 83, 78.

It is well established that a recitation with respect to the manner in which an apparatus is intended to be employed, i.e. "for forming a second seal with second valve seat at a first pressure"; "for forming a second seal...in the flow channel"; "...for forming an open configuration ...said second pressure" of claim 1; the recitation "for forming a third seal with the third valve seat" of claim 2; the recitation "...for opening at least the first seal ...the flow channel" and "...for opening the third seal in response...into the injection lumen" of claim 3, functional limitations, do not impose any structural limitation upon the claimed apparatus which differentiates it from a prior art reference disclosing the structural limitations of the claims

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent Nos. 6,364,861. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are not structurally distinguishable from the claims in the patents.
